

Maslin Maxim Mikhailovich

Python Backend Developer · 7+ years of commercial experience (Django, FastAPI, PostgreSQL)

Male, 49 years old, born May 30, 1977

Email: zapzarap@yandex.ru — preferred contact

MAX: max.ru/u/f9LHodD0cOJo6LfPoZriBTPNxYKVPwiMxcGpGqTTewSp5mwOzS946NvX8Ok

Telegram: [@dr_blumenau](https://t.me/dr_blumenau)

GitHub: github.com/mxmaslin

Location: Moscow, Shchukinskaya metro

Citizenship: Russia; authorized to work in Belarus and Russia

Relocation: Russia; open to business trips

Desired position

Python Backend Developer (Django, FastAPI, PostgreSQL)

Specializations: programmer, developer

Employment type: full-time

Work format: remote, hybrid

Work experience — 7 years 2 months

Commercial Python development. Developer documentation (Waves) — listed separately below.

April 2026 — present · 2 months

Fooddvor · Moscow · e-commerce

Python Backend Developer (FastAPI)

Product: WooCommerce online store, Telegram order notifications.

Stack: Python 3, FastAPI, Redis, Docker, GitLab CI, Pytest, REST API, HMAC, WordPress/WooCommerce.

- Designed **fooddvor-tg-relay** microservice (FastAPI): HMAC, idempotency, Redis/SQS queue, worker → Telegram Bot API.
 - Moved notification delivery off the checkout critical path; eliminated checkout blocking when Telegram API is unavailable.
 - Integrated WordPress: non-blocking call (2s timeout), direct API fallback.
 - Set up **GitLab CI** for the service and deployment.
-

February 2026 — March 2026 · 2 months

Open Solutions · Penza · compliance / GRC

Python Backend Developer (Django, DRF)

Product: GRC platform — action plans, workflow builder.

Stack: Python 3, Django, Django REST Framework, PostgreSQL, Redis, Celery, RabbitMQ, Docker, GitLab CI, Pytest, Swagger/OpenAPI.

- Built **REST API** for plan action assignees (CRUD, company/group/user permissions), Pytest integration tests.
 - Implemented CRUD for plan/action status transitions in workflow (pre-/post-functions, validations, service layer).
 - Restored **Swagger/OpenAPI** (drf-spectacular), stabilized GitLab CI.
-

August 2024 — December 2025 · 1 year 5 months

Big Three · Moscow · B3 low-code platform

Python Backend Developer (Django, DRF)

Stack: Python 3, Django, DRF, PostgreSQL, Redis, Celery, RabbitMQ, Docker Swarm, GitLab, Pytest, raw SQL.

- Implemented `get_depth_level` for hierarchical directories: depth in **one SQL query**, descendant updates in two (recursive **CTEs**).
 - Optimized critical queries (**EXPLAIN ANALYZE**), reduced hierarchy operation time.
 - Fixed “zombie login” on Gostech: **Keycloak** end-session + redirect chain.
 - Restored mail delivery (Celery LOW→MEDIUM queue) and profile defect in the low-code layer.
 - Refactored legacy B3 code; Pytest coverage for critical changes.
-

April 2023 — August 2024 · 1 year 5 months

Samolet Development · Moscow

Python Backend Developer (Django, FastAPI)

Stack: Python 3, Django, FastAPI, PostgreSQL, Redis, **Apache Kafka**, Celery, Docker, **Kubernetes**, GitLab, Pytest, **OAuth2**, django-guardian, Grafana.

- Deployed **2FA** for OAuth2 provider S.ID (15+ apps, 8000+ employees).
 - Forced logout: token revoke + Redis sessions on LDAP events.
 - Built **JWT proxy** for ECM (−67% access approval time).
 - Kafka GLPI adapter (50,000+ evt/min); **RBAC** in kafka-manager (guardian).
 - API documentation (ITHub/DockHub), OAuth2 2nd-line support.
-

November 2021 — November 2022 · 1 year 1 month

Globant · Ubisoft (Flare) · Minsk

Python Backend Developer — Python 2→3 migration (232 modules), Twisted, Azure AD, Pytest.

March 2020 — October 2021 · 1 year 8 months

Lendsbay · lendsbay.com · Moscow · fintech / P2P lending

Python Backend Developer — **AIOHTTP**, ~10,000 RPS to PostgreSQL, 100,000+ users; credit bureau XML parser; −12.3% churn (penalty forgiveness).

2017 — 2020 · 3 years

Waves · remote · fintech / blockchain platform

Technical Writer (developer documentation)

Focus: integration developer docs and cryptocurrency exchange **REST API**.

- Wrote and maintained **developer documentation** in **English**: guides, reference, integration scenarios.
- Documented exchange **REST API**: endpoints, data models, errors, request examples.
- Aligned API doc structure with backend teams; unified terminology for external developers.

After this period — commercial Python backend development (from 2020).

March 2017 — December 2017 · 10 months

FinTech · Moscow — Junior Python Backend Developer (Django, DRF).

September 2016 — March 2017 · 7 months

Internship (Corona Travel), Django freelance — forum engine, rental accounting, landing pages.

Education

MSU, Faculty of Philosophy, 1998

Professional development

2025 — Advanced Django 5 · 2024 — SQL Academy; Async Python · 2020 — Python Web Developer

Skills

Languages: Russian — native; English — B1 (technical documentation; Waves — EN)

Key skills:

Python, Django Framework, Django REST Framework, FastAPI, PostgreSQL, SQL, REST API, Redis, Celery, Docker, Git, GitLab, Pytest, Linux, Apache Kafka, OAuth, RabbitMQ, Swagger, SQLAlchemy, JavaScript, Kubernetes, Keycloak

Additional information

Samolet Development — Alexander Trubnikov (Head of Centralized IT Services)

About me

Python Backend Developer with 7+ years of commercial experience: Django/DRF, FastAPI, PostgreSQL, REST API, Celery, Redis, Docker, GitLab CI, Pytest. Strengths — integrations (OAuth2, Kafka), hierarchies and SQL/CTEs, GRC/workflow, e-commerce.

Previously 3 years writing developer documentation and REST API docs in English (Waves) — I design clear APIs and OpenAPI/Swagger. Frontend (JavaScript, Vue) for fullstack tasks when needed.

Area	Technologies
Backend	Django/DRF, FastAPI, AIOHTTP, Pyramid
Data	PostgreSQL, Redis, SQLAlchemy, recursive CTEs
Queues	Celery, RabbitMQ, Apache Kafka
DevOps	Docker, GitLab CI, Kubernetes (basics)
Security	OAuth2, JWT, Keycloak, HMAC, RBAC (guardian)
